

DataPro Logic Studio

Safety-Kleen

Success Story

As the nation's largest industrial and hazardous waste management company, Safety-Kleen was searching for a solution to integrate reporting capabilities with their information systems.

Seeing a need to update their information capabilities, management at Safety-Kleen chose to go with SAP, the industry leading solution for enterprise resource management. They also chose to implement an advanced integration platform, DataPro Logic Studio, as part of their reporting solution.

SAP was chosen to run Safety-Kleen's information needs, but several challenges remained in streamlining their information architecture. Viewing SAP data in another reporting system, at an acceptable cost to Safety-Kleen, was a major challenge, easily solved by DataPro Logic Studio, a connectivity

Safety-Kleen Solution

RISE created a solution that enabled the conversion and transfer of SAP R/3 data into viewable reports through a data warehousing solution, powered by DataPro Logic Studio.

Benefits of DataPro Logic Studio for Safety-Kleen

- Reliable Data Warehouse
- Scalable Data Solution
- Rapid Deployment
- Improved Data Visibility
- Reduced Risk
- Data Movement with Accuracy and Quality
- Best Price to Performance Ratio

Flexibility - DataPro Logic Studio adapts to each unique system implementation and operates in a wide variety of environments from application systems to legacy systems. The flexibility and scalability of DataPro Logic Studio allows for the easy viewing of Safety-Kleen SAP data with their existing Crystal Reports software, thereby eliminating any additional investment in a reporting solution.

Accuracy – From data mapping to quality assurance, DataPro Logic Studio is the reliable vehicle for data warehousing. DataPro Logic Studio's transformation functions, algorithms, and dataflow processes are instrumental in the solution that RISE engineered with Safety-Kleen.

With 100% reliability, Safety-Kleen is ensured that they won't lose any portion of their valuable SAP data as DataPro Logic Studio interfaces with their reporting solution.

Ease-of-Use

DataPro Logic Studio provides easy navigation and control throughout Safety-Kleen's entire data warehouse solution. Safety-Kleen was able to shorten the learning curve and reduce their total cost of ownership.

DataPro Logic Studio

Whether you are improving your business processes or supplying data to a reporting solution, DataPro Logic Studio makes managing your business easier through efficient data warehousing.

Advantages of Using DataPro Logic Studio

- Open architecture data connectors support heterogeneous database systems, ERP and CRM applications, flat file and XML data sources.
- Data cleansing and data profiling capabilities
- Provides migration testing prior to final production migration
- Exports data easily into new database system formats

RISE Technology Solutions

As a RISE client, you benefit from our deep "hands on" business and industry experience. RISE is a leader in current and emerging enterprise resource solutions, and our strong partnership with SAP allows us to quickly assess and address a company's IT needs.

RISE offers the ease-of-use, reporting capabilities, and reliability of DataPro Logic Studio as part of our implementations of SAP Solutions:

- Assembly and Technical Services
- Logistics and Distribution Services
- Professional and Staffing Services
- Baseline Safe Package

With their new SAP solution, Safety-Kleen chose DataPro Logic Studio as their platform to solve their SAP reporting and data warehouse needs, and they were able to take advantage of RISE' award winning Best Practices in the rapid design of DataPro Logic Studio for their system.

Safety-Kleen is part of the growing number of companies that are realizing the ROI and technical benefits of using the DataPro Logic Studio solution.
